

Tutorial para instalar GNU Octave en Microsoft Windows

GNU Octave es un software libre específicamente diseñado para la realización de cálculos numéricos, el cual es considerado la versión GNU del software Matlab.

La página oficial de GNU Octave se encuentra en el siguiente enlace:

<https://www.gnu.org/software/octave/>

The screenshot displays the GNU Octave website. At the top, the URL <https://www.gnu.org/software/octave/> is visible in the browser's address bar. The main heading "GNU Octave" is prominently displayed. Below it, a large image shows the GNU Octave software interface, which includes a file explorer on the left, a central workspace with a 3D surface plot, and a command window at the bottom. To the right of the software image, there is a vertical navigation menu with buttons for "Home", "About", "Download", "Support", "Get Involved", and "Donate". The "Donate" button is highlighted. Below the navigation menu, a text block states: "Your donations help to fund continuing maintenance tasks, development of new features and the organization of Octave conferences." Below this text, there is a "Continue" button. Further down, there is a section for "Donate Bitcoins" with a Bitcoin logo and a QR code. At the bottom, a text block states: "Bitcoin donations also accepted at this address." followed by a long alphanumeric string: "1E9HhBMK7E7U9H8UmuF4VYKAS5ZIEHF".

GNU Octave is a high-level interpreted language, primarily intended for numerical computations. It provides capabilities for the numerical solution of linear and nonlinear problems, and for performing other numerical experiments. It also provides extensive graphics capabilities for data visualization and manipulation. Octave is normally used through its interactive command line interface, but it can also be used to write non-interactive programs. The Octave language is quite similar to Matlab so that most programs are easily portable.

Para descargar GNU Octave en su version para Windows, es necesario acceder al siguiente enlace:

<https://www.gnu.org/software/octave/download.html>

Y posteriormente dar click sobre el enlace marcado en la siguiente pantalla.

<https://ftp.gnu.org/gnu/octave/windows/>

Download GNU Octave

GNU Octave 4.0.3 was released July 2, 2016. Please read the [announcement](#) on the front page of the Octave web site.

GNU/Linux systems

Executable versions of Octave for GNU/Linux systems are provided by the individual distributions. Distributions known to package Octave include: [Debian](#), [Fedora](#), [Gentoo](#), and [SuSE](#). These packages are created by volunteers. The delay between an Octave source release and the availability of a package for a particular GNU/Linux distribution varies. The Octave project has no control over that process.

BSD systems

Executable versions of Octave for BSD systems are provided by the individual distributions. Both [FreeBSD](#) and [OpenBSD](#) have Octave packages. These packages are created by volunteers. The delay between an Octave source release and the availability of a package for a particular GNU/Linux distribution varies. The Octave project has no control over that process.

OS X

The Wiki has some instructions for [installing Octave on OS X systems](#).

Windows

Windows binaries with corresponding source code can be downloaded from <https://ftp.gnu.org/gnu/octave/windows/>
